

题目描述	珍妮特的鸭子每天产16个蛋。她每天早上吃3个做早餐，还用4个做给朋友们的松饼。她每天把剩下的鸡蛋以每个2美元的价格卖给农贸市场。那么，她每天在农贸市场赚多少钱？ (Janet' s ducks lay 16 eggs per day. She eats three for breakfast every morning and bakes muffins for her friends every day with four. She sells the remainder at the farmers' market daily for \$2 per fresh duck egg. How much in dollars does she make every day at the farmers' market?)
解题步骤	珍妮特每天卖$16 - 3 - 4 = \langle\langle 16-3-4=9 \rangle\rangle 9$个鸭蛋。 她每天在农贸市场赚$9 * 2 = \\$\langle\langle 9*2=18 \rangle\rangle 18$。 #### 18 (Janet sells $16 - 3 - 4 = \langle\langle 16-3-4=9 \rangle\rangle 9$ duck eggs a day. She makes $9 * 2 = \\$\langle\langle 9*2=18 \rangle\rangle 18$ every day at the farmer's market. #### 18)
蕴含公式	[总量] - [消耗数量] = [剩余数量] [单价] * [数量] = [总价]
